The project's purpose is to re-use the rural and agricultural spaces by creating an immersive, flexible, and interactive environment. The project focuses on the relationship between the building and the landscape, emphasizing the integration of nature and architecture. The design is modular and adaptable, allowing for different uses and configurations. The materials are chosen to be sustainable and locally sourced. The project aims to create a place that fosters community and encourages interaction with the environment.

Although the images are in Romanian, the text suggests that the project is about reusing rural spaces. The materials and techniques used are designed to be eco-friendly and sustainable. The project is envisioned as a flexible space that can be adapted to various uses, such as agricultural activities, social events, and educational programs. The design integrates natural elements to create a harmonious relationship with the landscape. The project emphasizes the importance of connecting people with nature and fostering a deeper understanding of the role of architecture in shaping the environment.
